**Dear Local # 13 boilermakers Alex Tallick
Subject: Spring Outage, Unit # 3 Brunner Island PPL
Power Station**

As you're probably aware by now, the spring outage on unit # 3 went extremely well. We would like to thank you and your agents for aiding in the success of the endeavor. The talent provided by you and your staff helped us to succeed at all levels.

The men did an outstanding job from start to finish. It should be noted the vast amounts of rigging and welding of Final Superheats headers and Element & the Water Wall work was a large scope of work to complete in a 52 day outage.

We would also like to mention the tremendous job done by the supervision that you provided. Both the General foreman, Foremen and Steward that kept the job running smoothly and stayed on top of their areas of responsibility. Their input and experience helped us to achieve our goals with minimal problems. And also to achieve zero recordable with a job this size is outstanding.

We are looking forward to working with you and your membership on the up and coming outage on unit # 2 at Brunner Island this fall.

**Respectfully,
Jeff Kiley Boiler Manager
Joseph Dulaney Project Manager
